## Aqua ProMarker 12 Set

Product Code : APMM1 | Barcode : 801199003236

This is a one-stop answer for artists and crafters needing a balanced selection of water-based colour. It will appeal to Scrap bookers and Rubber Stamps and also to Water-colour Illustrators as an alternative to paint-based media.

Includes 12 Aqua ProMarker colours plus a special 'Blender' marker that can be used to merge or drag applied colour.

Aqua ProMarkers use water based pigmented inks. These have the advantage of being water soluble - they can be easily blended, even when dried, giving the effects of water-colour paint but with the convenience of a marker.

Aqua ProMarkers are particularly suitable for popular craft activities. Being water based, they can be applied to rubber stamps and then easily cleaned away. And since pigmented ink is acid free and light fast, it gives the excellent colour longevity required by Scrap Bookers.

Aqua ProMarkers feature a unique brush shaped nib at one end, enabling a soft-edged application of colour.

## Aqua ProMarker 5 Set

Product Code : APMF1 | Barcode : 801199003243

A small, entry level set including 5 Aqua ProMarkers in a range of complementary hues. Good first time buy for customers wanting a basic colour selection.

Also an easy way for customers to expand the Aqua ProMarker palette by combining with the larger 12 Set. Another golden opportunity for cross-selling!

Aqua ProMarkers are non toxic and conform to relevant US standard ASTM D-4236
